Conducted an Ethnographical Study on the Philippine General Hospital (PGH)

Seminars Attended: Participant, Undergraduate Chemistry Research Seminars (2006-2008)
Participant, SOSE Student Research Symposium (2007)

Skills and Interests: I am rather proficient in oral and written English and Filipino. I can also speak Level 2 French and basic Mandarin. I have good research skills and I am proficient in Windows applications (*i.e.* Word, Excel, and Powerpoint), basic Java programming. I am also acquainted with basic multimedia skills

(*i.e.* movie-making and photo editor). I do public-speaking (toastmasters) and I engage well with all sorts of people. I am very interested in photography and I am also artistically-inclined (I do mostly sketch work). I believe there are no flukes; there is no luck; only talent and focus. And I know I have both.

When I am not juggling academic work and thesis work, I spend my time playing tennis or reading men's style magazine (GQ) and modern architecture digests (Dwell).
