Certificate of Distinction in the 2002 Australian Mathematics Competition  
Certificate of Credit in the 2001 Canadian Math Open  
Various math awards for local and national competitions (1999-2003)

**Skills:**

My interpersonal communication skill is good. I can speak and write in English and in Filipino rather well. I also know how to speak and write in Chinese (in Fookien and Basic Mandarin) and I am also able to speak in many different dialects like Bisaya and Chavacano. I have an estimable knowledge in computers, both in hardware and software. I am well versed in Microsoft office applications and have also done a number of programs in C++. I also have basic skills in Adobe Photoshop and some video editing softwares. I have also been trained and can fairly teach math contest problems well in high school level.

**Interests:**

I enjoy doing math especially those that involve teaching and solving math contest problems for high school and elementary math olympiads. I am also fond of reading books of different genres from fantasy, sci-fi to classic ones. I also love reading magazines of all sorts especially those about the latest gadgets, trends and cutting edge innovation. I also love immersing myself with anything related to computers, be it fixing my computer to surfing the internet. I also play badminton and want to engage myself in different sports for fun.
